WRITING TIME

"Day at the club"

five friends – football practice

Only five people came to the club last night. Some of them weren't feeling well. Adel hurt his ankle at a football practice last night. Doha had an earache from swimming. I have a backache, too.

"Elephants"

* How big are the elephants?
* How do elephants' ears look like?

Elephants are enormous, strong, and special animals. Elephants' sides are very tall and they are like big strong walls. Elephants' legs are round and strong like tree trunks. Elephants' ears are smooth and flat like a leaf. Elephants' tusks are long, hard, and smooth just like dangerous spears. Elephants' trunks are long and flexible like a snake. Elephants' tails are just like a rope.

"Water"

take showers – sea water

Water is very important especially fresh water. We can't live without fresh water. We drink fresh water; we cook with fresh water and we water the crops with fresh water. We also take showers with fresh water. Fresh water is found in rivers, lakes, streams, and glaciers. There is also salt water that we also call it sea water. We can't drink salt water. It's dangerous to drink salt water. It's bad for the stomach.

"The usage of honey"

* Do you like honey?
* What do you use honey for?

I really like honey. I like to drink honey and milk, and sometimes honey and lemon when I cough, or when I have a sore throat. Some doctors use honey as a treatment for wounds. Doctors use a special kind of honey. Only doctors can use this special honey. Honey contains things that can help to kill bacteria and heal wounds.

The furniture in Ancient Egyptian homes was very different from today. There were reed mats to sit and sleep on. They used papyrus to cover the windows and doors. This kept the insects outside. In every home, there were large pots and baskets for storing crops and wooden boxes for clothes. Not many people had beds or chairs.

In cities, people lived very close together, and so they built their houses taller, with two floors. This saved space so they could build more houses. City houses joined together, just like today. In the countryside, houses usually only had one floor, and they also had a garden. They grew vegetables and kept chickens there.

Ancient Egyptian homes

Guiding fact file :

- What did their homes look like?	- They had flat roofs.
- What did they use to build it?	- They used mud bricks to make them.

In Ancient Egypt, many people made their homes near the Nile. They used the mud from the river to make bricks for their houses. The mud bricks made very strong walls. Ancient Egyptians wanted to keep their homes cool. The mud bricks helped do this. Ancient Egyptian homes all had flat roofs, which were the coolest part of the house.
